

Service Lift Dumbwaiter

Every Delivery Shapes an Experience.

Every day, thousands of items travel quietly through buildings.

A fresh meal reaches a guest's room.

Clean plates return to the kitchen.

Clothes arrive safely on the right floor.

Documents move between offices.

Equipment reaches where it is needed, exactly when it is needed.

Most people never notice these movements.

Yet they define the speed of service, the efficiency of operations and, ultimately, the experience every building delivers.

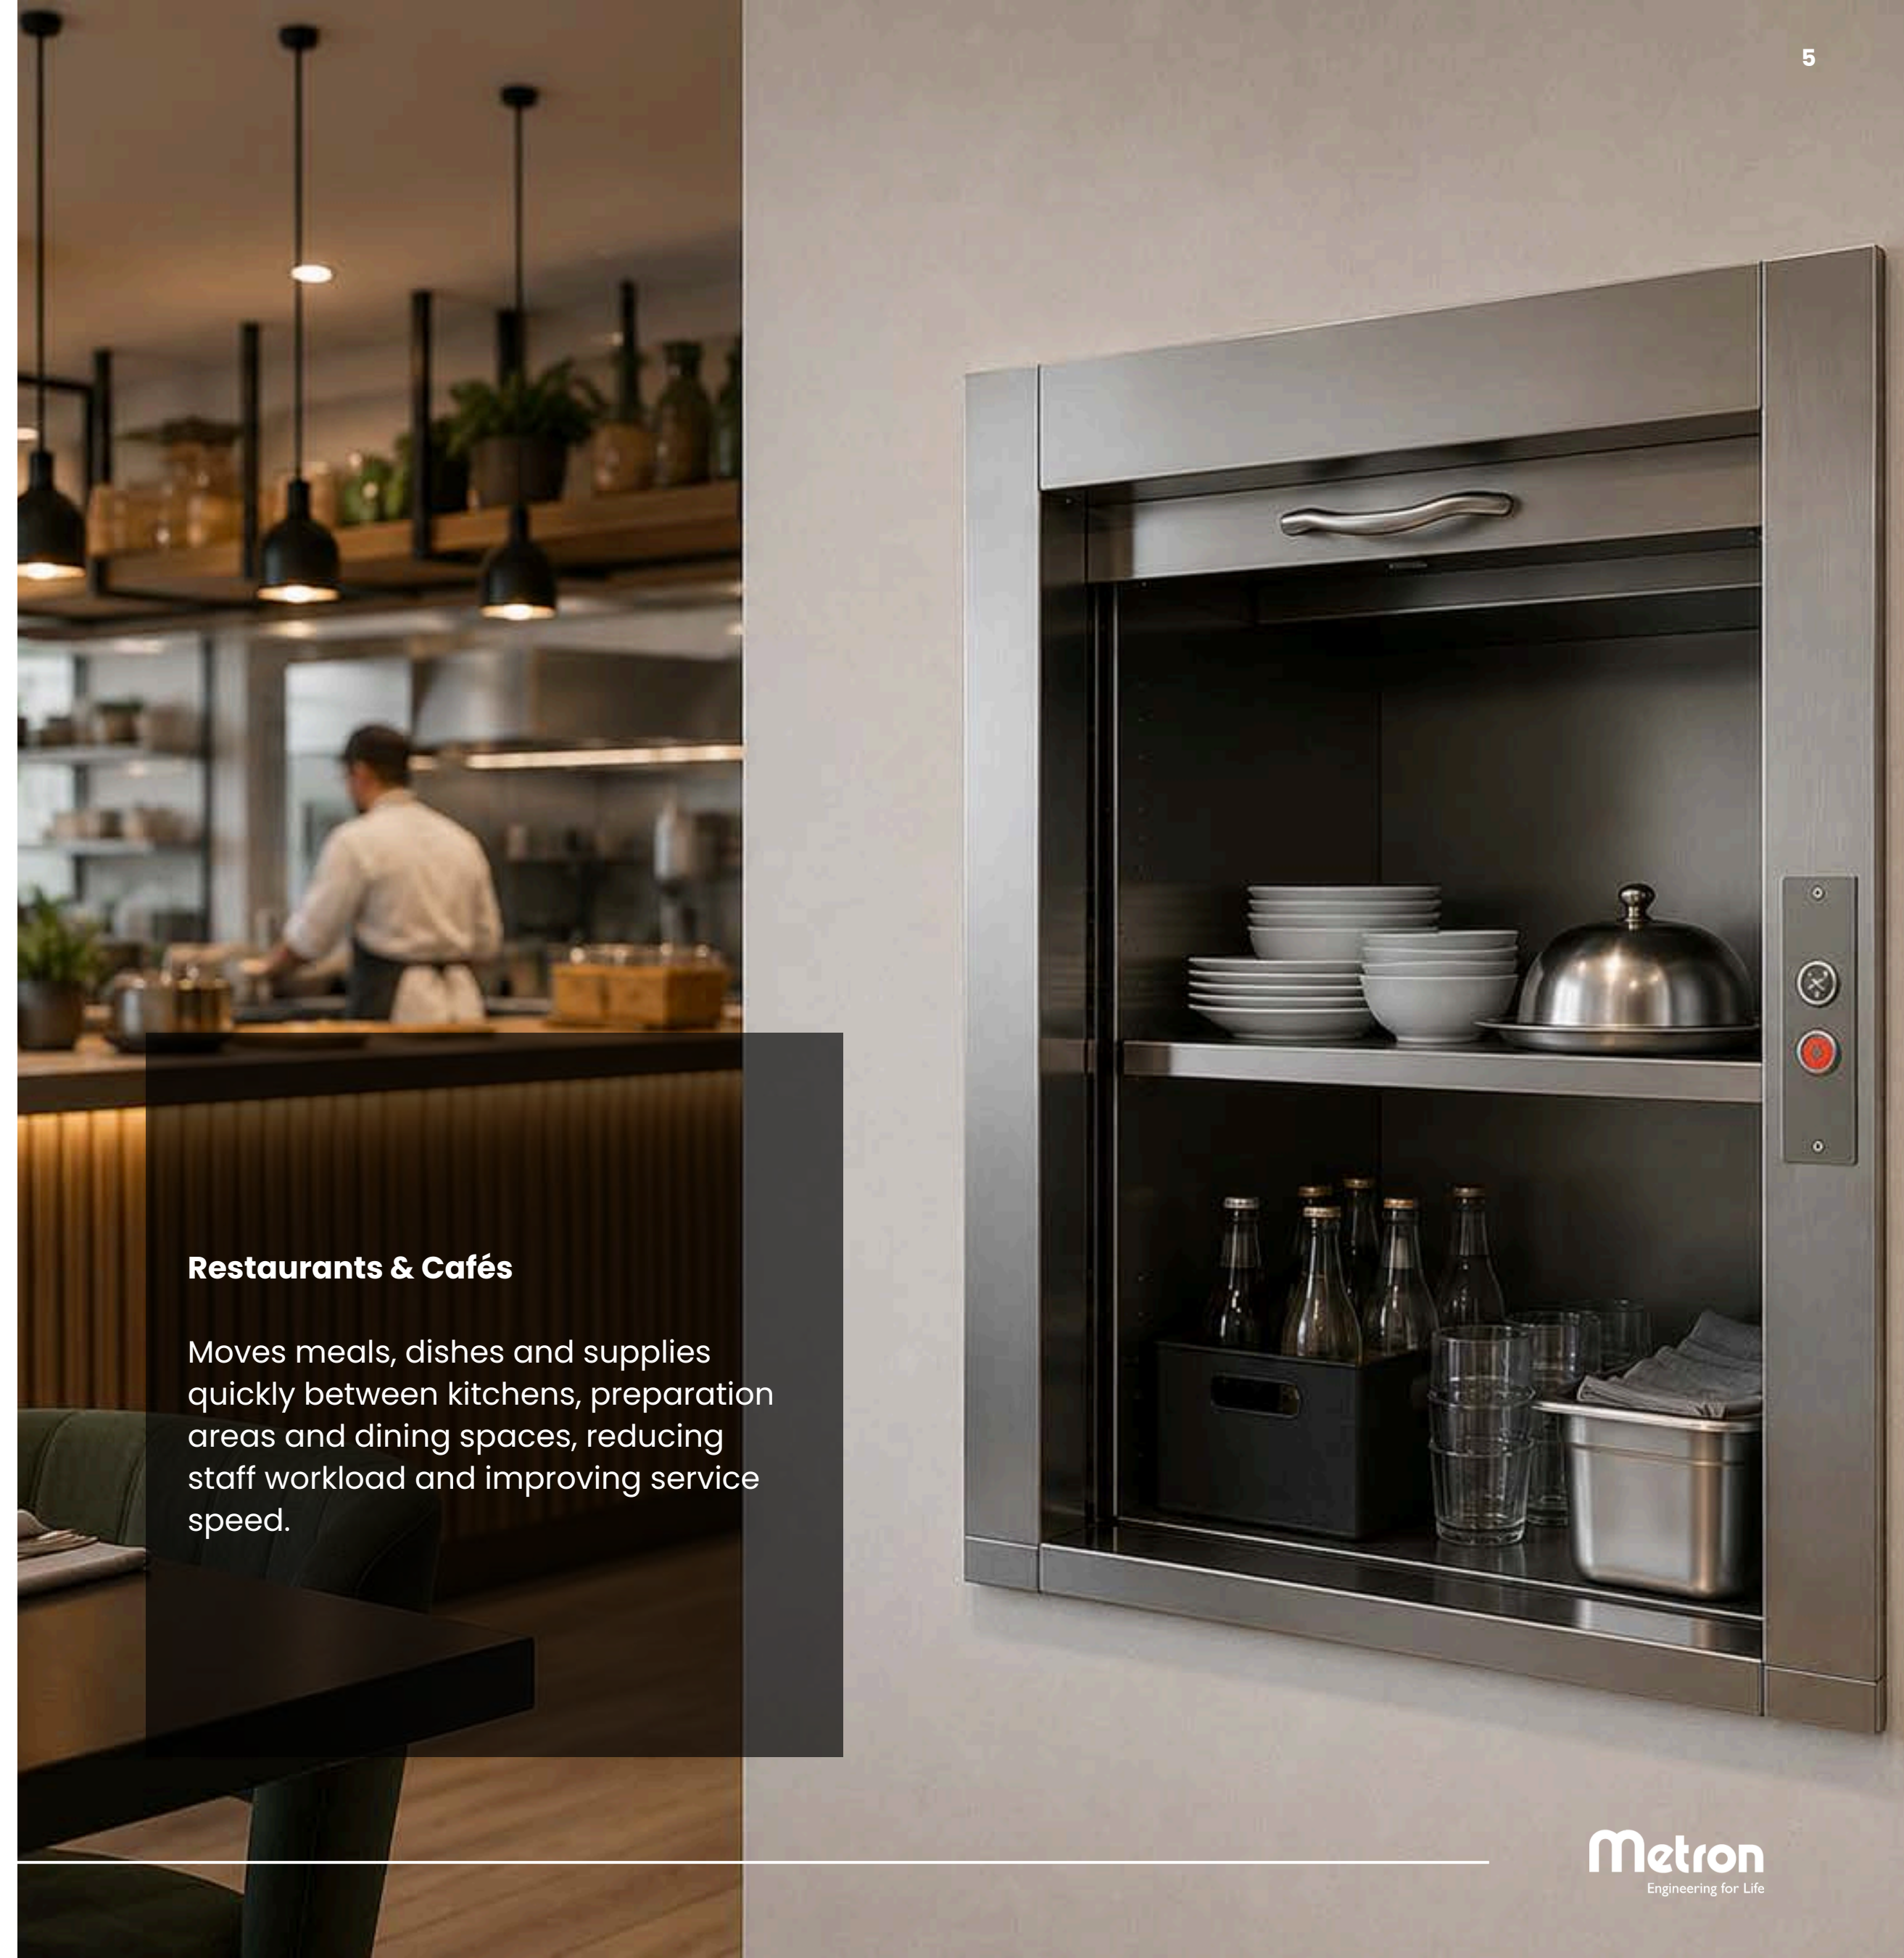

At Metron, we believe a dumbwaiter should simplify daily operations, improve productivity and support the people who use the building every day.

Designed for restaurants, hotels, hospitals, offices, laboratories, retail spaces and residential buildings, the Metron Dumbwaiter combines reliability, compact design and engineering precision to move goods quickly, safely and reliably, helping professionals improve efficiency while allowing people to focus on delivering exceptional service.

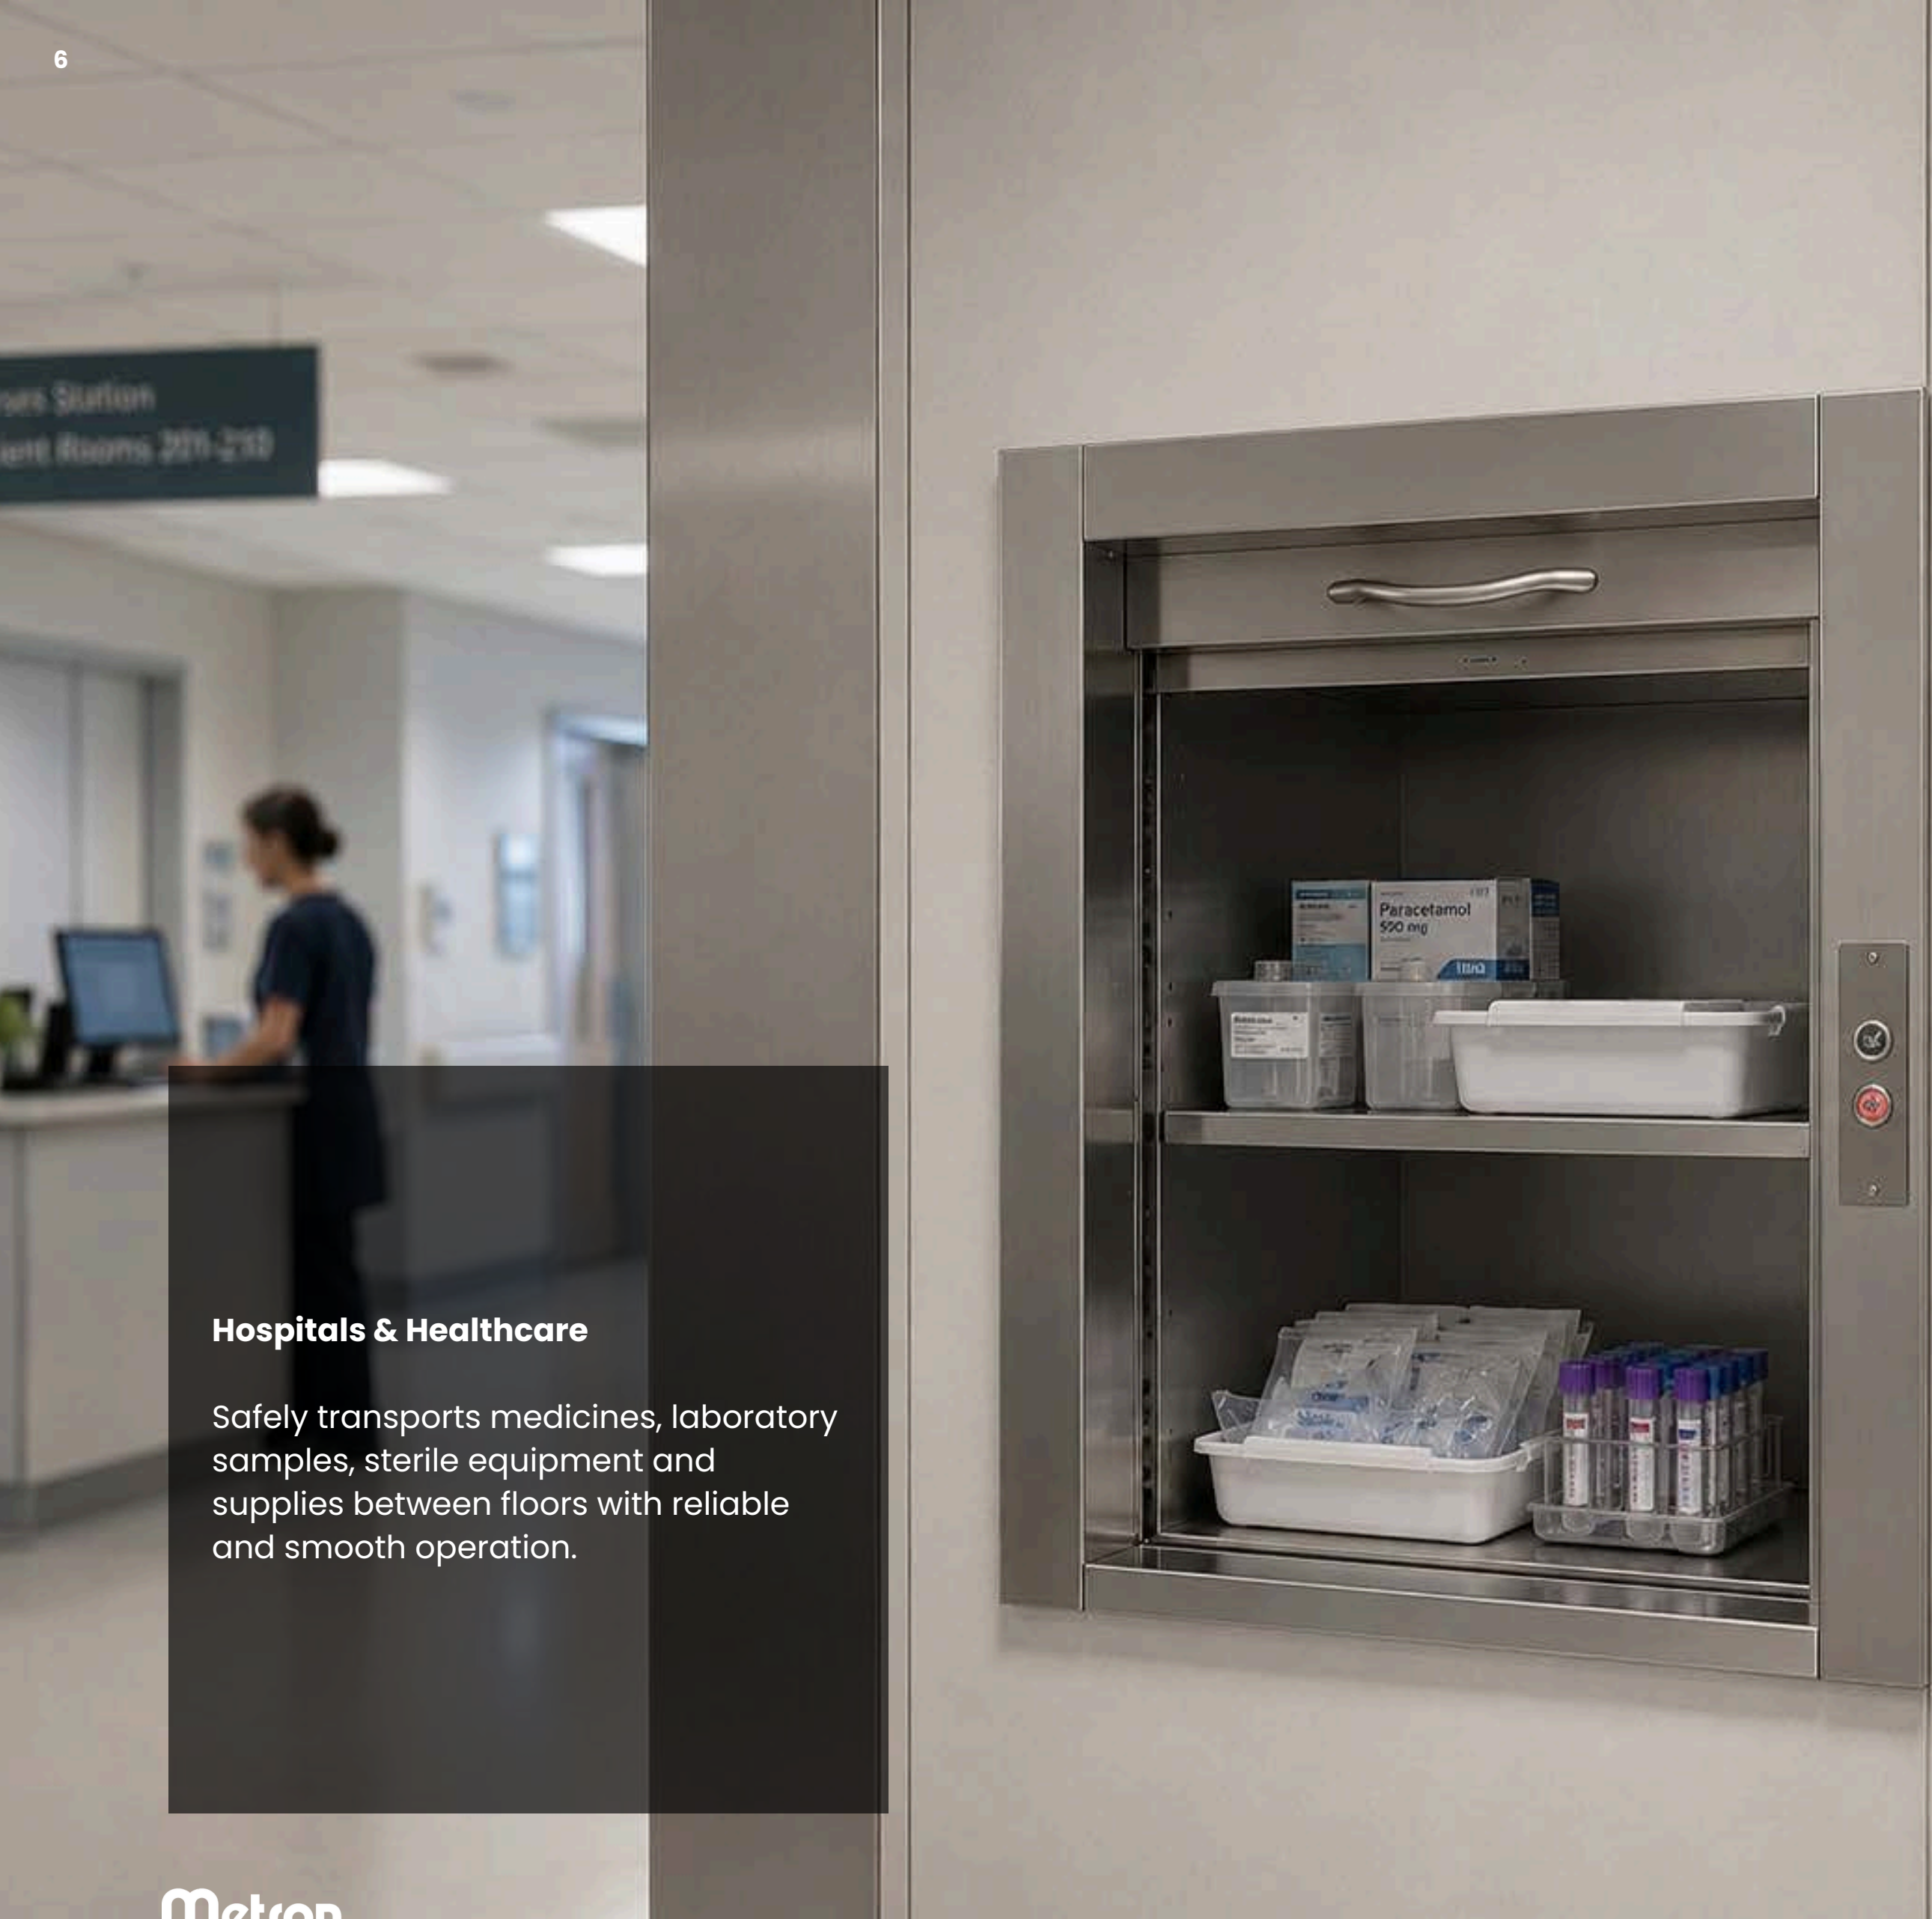

Hotels

Improves room service operations, housekeeping efficiency and internal logistics while keeping service areas separate from guest circulation.

Restaurants & Cafés

Moves meals, dishes and supplies quickly between kitchens, preparation areas and dining spaces, reducing staff workload and improving service speed.

Hospitals & Healthcare

Safely transports medicines, laboratory samples, sterile equipment and supplies between floors with reliable and smooth operation.

Retail & Commercial Buildings

Transports products, stock and supplies between storage areas and sales floors quickly and safely.

Offices

Moves documents, parcels and internal deliveries efficiently while improving productivity and reducing unnecessary staff movement.

Residential Buildings

A practical solution for transporting groceries, laundry, luggage or everyday household items between different levels of the home.

Why Professionals Choose Metron Service Lift

European Manufacturing

Designed and manufactured in Europe under strict quality standards.

Exceptional Value for Money

The ideal balance of quality, performance and investment.

Reliable Everyday

Designed for continuous daily operation with dependable performance.

Space Efficient Design

Compact dimensions maximize usable building space.

Fast & Easy Installation

Designed to simplify installation and reduce project completion time

Custom Configuration

Flexible dimensions and specifications to meet individual project requirements.

Technical Support

Experienced engineering teams supporting every project from specification to commissioning.

Long-Term Spare Parts Availability

Reliable spare parts support throughout the product lifecycle.

Fast Lead Times

Efficient manufacturing for reliable delivery schedules.

Tailored to Your Project

If your project requires specifications beyond the standard range, Metron can provide customized solutions to meet your special requirements.

Load	up to 100 kg
Type	Traction MRL
Max Cabin Size (WxDxInt.H) mm	1000 x 1000 x 1200 mm*
Max Cabin Area	1x1 (1m²)
Min Cabin Area	0.5x0.5 (0.25m²)
Max Travel	12m
Max Stops	4
Max Speed	0,3 – 0,4 m/s
Service Height	Min 700mm
Landing Doors	Bi-parting doors
Material Cabin, Doors	Stainless Steel 1.401 (AISI430) or Galvanized (Zink Coated)
Machine Door	Hinged
Cabin Entrance	1
Control Panel	Metron Passo (Relay Logic)
Prewiring	Metron
Main Voltage	3x 400V 50HZ
Conformity	Compliance with Machinery Directive 2006/42/EC.

*For internal cabin heights above 1000 mm, a minimum service height of 800 mm is required.
